★ Grinding regulator

This end is the grinding degree regulator

Based on the origin

7-12 circles for espresso
14-22 circles for hand drip
24-28 circles for press pot

- ☆ Rotate clockwise the button to starting point.
- ☆ Information of grinding circles above is suggested. Please take practical situation for your evaluation.
- ☆ To protect conical burr, do not grind beans within 0-6 circles.
- ☆ Put the handle cap back when adjust thickness.
- ☆ Do not rotate counter-clockwise adjusting button too many times. It will lead to damage of conical burr.

★ Notices

- ☆ The product design is only for coffee beans.
- ☆ Please apply brushes to clean the product. Don't water clean it.
- ☆ Conical burr is sharp. Please be careful when in usage.
- ☆ Please put away from kids.

If it needs to replace conical burr or other spare parts, please operate that under technician's instructions.
